- Proven capability to split 0.008 inches (0.2 mm) thick metal into two members measuring 0.004 inches
- Incorporate geometric shapes into product design that were not previously possible
- Can be produced in stainless steel, brass, copper, aluminum, and carbon steel
- Precision makes MET-SPLIT™ well suited for applications in the medical, electronics, and telecommunications industries

MET-SPLIT™ Technology

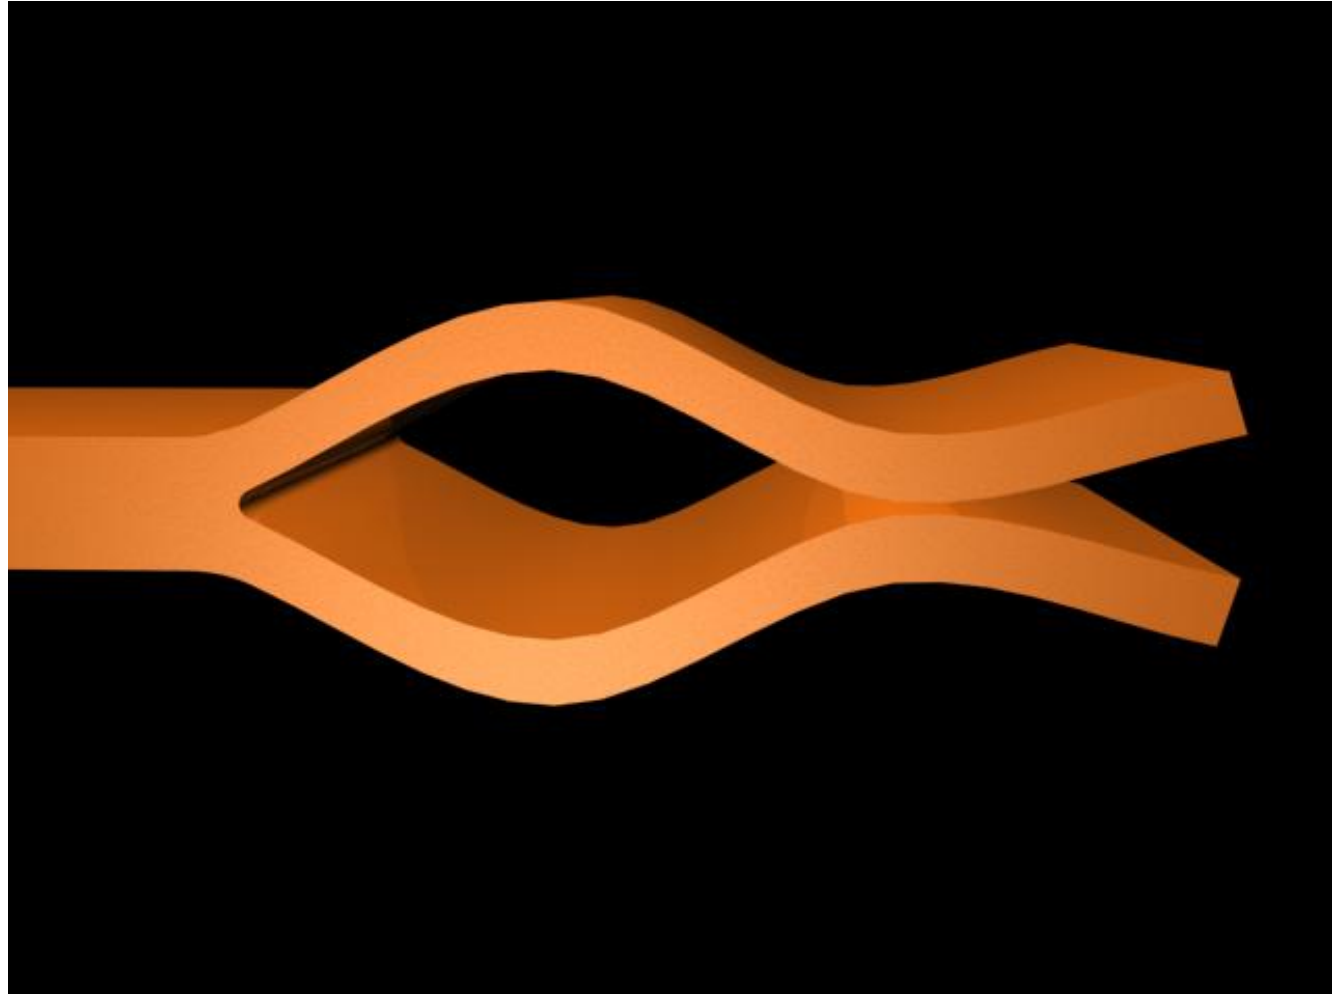

MET-SPLIT™ technology is protected by US Patent Nos. 4,909,763; 4,738,026; 4,970,782; 4,827,612
